

Our Practicum Learning Experience Documentary (iMovie) Planning

Artifacts/Scenarios and Talking Points

Andrew Chicoine

Artifact/Scenario 1

I will open up with a couple pictures of my host classroom. This will allow viewers to see where I performed my practicum and how the class is set up to promote learning.

- Talking point 1- the desks are set up in groups so students can work together.
- Talking point 2- the smart board is a tool used by my teacher to integrate technology into the classroom

Artifact/Scenario 2

The morning meeting.

- Talking point 1- Students are welcoming each other to class getting ready to begin the day.
- Talking point 2- they play a game to improve the class climate. Having students that are excited to learn and be in class improves student performance.

Artifact/Scenario 3

Spelling and reading.

- Talking point 1- Every Monday the students are given 10 new vocab words that they must learn
- Talking point 2- This is the more traditional method of education. They still work on hand writing and spelling
- Talking point 3- There is a center provided by the teacher with a variety of books age appropriate for the students to read.

Artifact/Scenario 4

Geography

- Talking point 1- Social studies is integrated in ELA
- Talking Point 2- Students work in groups to collaborate and try to problem solve about different cultures and climates around the world.
- Talking point 3- Helps cater to different learners because high and low-level learners can work together to complete the task.

Artifact/Scenario 5

Smart Math

- Talking point 1- another way to integrate technology in the classroom.
- Talking point 2- read stories on line and answer quizzes earn stickers to win prizes. This helps create a game for the students.

- Talking point 3- Star math helps track each student's skill level helps the teacher know how the students are progressing and what they need to work on.
- Talking point 4- Keeps students engaged and is a fun new way for students to learn.
